State Board Adopted Guiding Principles for Legislative Process (Dec 2024)

- Ensure **coherence** across changes to the system by building upon areas of strength from the current system to maintain high expectations for all Colorado students. Changes should be intentionally sequenced, rather than taking a fragmented or a piecemealed approach. Align, where possible, with other task force recommendations (e.g., 1215 Task Force) and federal accountability expectations. Take efforts to balance the cost of implementing change with the potential long-term impacts.
- Enhance **transparency and trust** of the accountability system, including access to information for families, schools, and the general public.
- Ensure statewide consistency using multiple measures that **meaningfully differentiate** sites to guide resources and supports.
- Strengthen the **continuous improvement** approach for all sites by ensuring a continuum of resources and supports. This includes recognizing performance and identifying bright spots to foster shared learning, proactively supporting schools to help them avoid entering the accountability clock, and expanding end-of-clock options.
- Ensure that statutory language is **flexible** enough so that adjustments can be made over time, based on stakeholder feedback and ongoing research.

Broader Discussion and Advice on Stakeholder Engagement in Accountability

Input on Stakeholder Engagement in Accountability

Think about the ways transparency and stakeholder engagement are woven throughout the accountability system currently.

- What works now? What doesn't work as well?
- Consider what the 1241 Task Force is recommending (e.g., public reporting).
- What would be an ideal state?
