TAP Principles for Performance Frameworks

- **Student growth percentile data is by far the most valuable** part of the accountability system.
- Data included in the accountability system should be **verifiable and valid, accessible and transparent**.
- There should be **consistency across grade bands, schools, and districts**, and the **greatest practicable use of growth data** in making accountability calculations.
- **Recommendations should be grounded in empirical analysis when possible, including deliberate study of the impact on historically disadvantaged groups and the schools and districts that serve them.**
- Recommendations should **consider the need for flexibility to adapt to changing contexts across schools**.
- Recommendations should be **grounded in/motivated by a clear theory of action indicating how the recommendation will accomplish the intended aims (and consider potential unintended consequences)**
- Some metrics are more technically sound than others. **Metrics should be evaluated on criteria related not only to reliability of the interferences they will yield.** A somewhat less reliable measure of the right thing is preferable to a highly reliable metric that has negative consequences for historically disadvantaged groups and the schools and districts that serve them.

We will continue hearing from the remaining study groups that are now ready to receive feedback on their Opportunities, Challenges, and Observations

- **The intent is to use these full descriptions to inform your work on recommendations, not be your recommendations.**
- **We will continue bringing this content back to you until everyone can live with the content.**
- **We are focusing on content only. Ed First will put this into report language and you will have multiple chances to review that language in the final report.**

The two groups ready for feedback today include:

Assessments

Measures for High School

Our goal is to get consensus on the content

Study groups will review the written feedback and decide what still needs discussion.

The study group will lead a discussion to gather more information, get clarity, or to disagree with feedback. Attempt to come to consensus.

Make changes and decide if it is “done for now” or if there is still work and additional discussion needed.

Now let's shift to Study Group Recommendations

As a reminder: When you make and review recommendations – think about the kinds of things the **education committees of the house of representatives and senate, the governor, the state board, the commissioner of education, and the department** can do.

- Pass/change a law
- Allocate funds for something
- Require additional research
- Require the creation of rules
- Require action/change by CDE
- Etc.

The more specific your recommendation is about what you want done, and by what authority, the more likely it is to happen.

There is a range of grain size our recommendations can reflect

Let's use the example of growth and proficiency percentages.

The legislature should direct CDE to have the TAP reconsider the percentages of growth vs. proficiency.

The percentage of growth should be higher/lower.

Change the percentages to X% for growth and X% for proficiency.

We think it is not operating correctly but we are not exactly sure of the specifics of how to fix, OR we cannot reach consensus on the specifics.

We know it should shift up or down, but not sure the final number, OR we can gain consensus on up or down, but not the specific number.

We feel we have enough expertise and information to give a very specific number AND we can gain consensus on the specifics.

Here is where we will track progress.

Study Group	Background	Rec. 1	Rec. 2	Rec. 3	Rec. 4	Rec. 5	Rec. 6	Rec. 7
N-Size	Done for now	Ready	Ready	Ready	Ready	Ready		
Trends	Done for now	Done for now	Ready	Done for now				
Assessment	Done for now	Brainstorm	Brainstorm	Brainstorm	Brainstorm	Brainstorm	Brainstorm	
High School	Done for now	Done for now	Done for now	Done for now	Ready	Done for now	Done for now	Done for now
Early Grades	Done for now	Done for now						

Here is where we will track progress.

Study Group	Background	Rec. 1	Rec. 2	Rec. 3	Rec. 4	Rec. 5	Rec. 6	Rec. 7
Reporting & Engagement								
Improvement Planning								
Supports & Interventions

Our goal is to get consensus on the content

Study groups will review the written feedback and decide what still needs discussion.
