

2024 PSAT and SAT State Achievement Results

Interpretation Considerations

- Spring 2024 PSAT/SAT assessments included numerous enhancements, including online administration, new item types, adjustments to content distributions, and different technical approaches, that may have affected student testing experience and scores. Comparisons with results from prior years based on the paper-based version of PSAT/SAT should be made with caution, especially in math.
- Interpretation of school, district, and state results should be made with caution when participation rates are low and/or representativeness* is limited.
- Cross-state comparisons should consider differences in participation rates and representativeness* across schools, districts, and student groups.

*Representativeness: how well the demographics of the tested student population mirrored the demographics of the enrolled student population
