

Make it easy for schools and families to plan trips: The Administration will distribute information and resources to make it easy for teachers and families to identify nearby public lands and waters and to find programs that support youth outings.

Provide transportation support to schools with the most need: As an integral part of this effort, the National Park Foundation (NPF) – the congressionally chartered foundation of the National Park Service – is expanding and re-launching its Ticket to Ride program as Every Kid in a Park, which will award transportation grants for kids to visit parks, public lands and waters, focusing on schools that have the most need.

Provide educational materials: The initiative will build on a wide range of educational programs and tools that the federal land management agencies already use. For example, NPS has re-launched a website with over 1,000 materials developed for K-12 teachers, including science labs, lesson plans, and field trip guides. And a number of federal agencies, including the Bureau of Land Management, Forest Service, Fish and Wildlife Service, National Oceanic and Atmospheric Administration, Department of Education, and NPS participate in Hands on the Land, a national network of field classrooms and agency resources that connects students, teachers, families, and volunteers with public lands and waterways.
