

READ Plans

Unpacking Required Elements

The Colorado Reading to Ensure Academic Development Act (READ Act) states specific processes and elements to be apart of READ Plan creation and ongoing support. This resource document will review the required elements designated in legislation for READ Plan creation as well as what's required for ongoing, active READ Plans.

READ Act calls for the following to be included in READ Plans:

- Screening or interim assessment results, diagnostic assessment results including specific skills deficiencies identified
- end of year goal as well as ongoing objectives to meet the end of year goal,
- aligned interventions and services that are in addition to 90 minutes of evidence-based universal instruction,
- progress monitoring,
- specific family communication and involvement in supporting the READ Plan,
- supplemental services, and
- a way to monitor ongoing progress to ensure more is happening for students still identified as having a Significant Reading Deficiency more than one year.

To support deeper understanding of the call to action as set forth in READ Act legislation and State Board of Education Rules, the following definitions have been provided.

Key words as defined by the READ Act & State Board of Education Rules

Evidence-based: *The instruction or item described is based on reliable, trustworthy, valid evidence and has demonstrated a record of success in adequately increasing students' reading competency in the areas of phonemic awareness, phonics, vocabulary development, reading fluency, including oral skills, and reading comprehension (Rules, 2.09).*

Scientifically based: *The instruction or item described is based on research that applies rigorous, systematic* and objective procedures to obtain valid knowledge that is relevant to reading development, reading instruction, and reading difficulties (Rules, 2.27).*

***Systematic Instruction:** *A carefully planned sequence of instruction that is thought out and designed before activities and lessons are planned, maximizing the likelihood that whenever children are asked to learn something new, they already possess the appropriate prior knowledge and understandings to see its value and to learn it differently (Rules, 2.33).*

Local Education Provider: *A school district, a board of cooperative services, a district charter school, or an institute charter school (Rules, 2.18)*

Intervention: *The practice of providing *scientifically based, high-quality instruction and progress monitoring to students who are below proficient reading (Rules, 2.13). *as defined above*

The remaining pages unpack the required READ Plan elements in a checklist format.

READ Plan Initiation and Implementation
