Performance Framework Reports and Improvement Plans

The district and school performance frameworks provide a snapshot of the district or school's level of attainment on academic achievement, growth, growth gaps and postsecondary readiness.

Improvement plans provide information on the district or school's data trends, root causes and targets, and identify strategies and resources the district or school will use to improve student academic outcomes. Plans are submitted to the Department for publication each year on April 15. As planning is an ongoing process, these documents reflect a "point in time" plan submission."

Click on a district or school name to view its performance framework reports and improvement plans:
