

Overview

Section 104(a) of the Healthy Hunger-Free Kids Act amended section 11(a) (1) of the Richard B. Russell National School Lunch Act (NSLA) by establishing the Community Eligibility Provision (CEP). One requirement of the CEP is for local educational agencies (LEAs) that participate in the National School Lunch Program (NSLP) and/or the School Breakfast Program (SBP) to collect and report information on the identified and enrolled students as of April 1 each year. This data will be used for potential implementation of CEP in 2022-2023 and will be collected via the School Nutrition Unit's online system, the [Colorado Nutrition Portal](#).

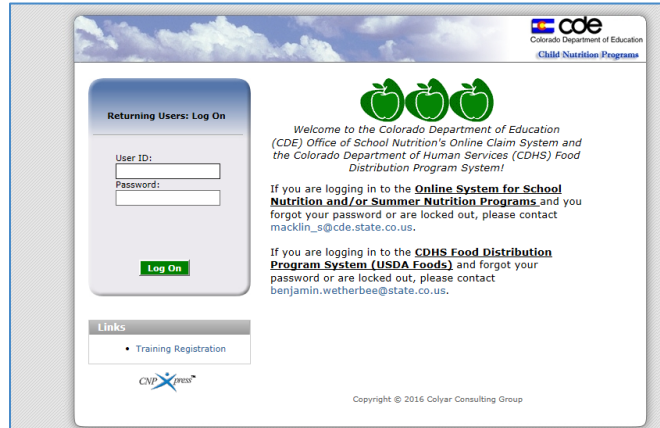

Prior to reporting, your LEA will need to collect information on the number of identified students and enrolled students at each school site as of **Friday, April 1, 2022**. Identified students include any student who has been certified for free school meals without the use of a household application. This refers to students directly certified with documentation from:

- Supplemental Nutrition Assistance Program (SNAP)
- Extended Eligibility with SNAP
- Federal Distribution Program on Indian Reservation (FDPIR)
- Foster children certified through means other than a household application
- Migrant children certified by a migrant coordinator
- Runaway and homeless youth as defined under the McKinney-Vento Homeless Act or under the Runaway and Homeless Youth Act
- Children enrolled in a federally funded Head Start Program or a comparable state funded pre-kindergarten program
- Non-application children approved by a local education official

An enrolled student is defined as any student who is enrolled in and attending schools that participate in the NSLP and/or SBP and who have access to at least one meal service daily. This includes half day students with access to at least one meal service. It does **not** include students who are enrolled in the school but do not have access to at least one meal service.

Instructions

The Community Eligibility Provision (CEP) for the National School Lunch Program (NSLP) provides an alternative to household applications for free and reduced price meals for economically disadvantaged students in local educational agencies (LEAs) and schools. Sites that elect this option agree to serve all students free lunches and breakfasts for four (4) successive school years and claim the meals based on a percentage of Identified Students multiplied by a USDA-defined multiplier factor.

Sites which have an Identified Student Percentage (ISP) of 40% or greater are eligible for this option.
 Sites which have an Identified Student Percentage (ISP) between 30.00% - 39.99% are potentially eligible.

Enter each Site's Number of Identified Students and Enrollment as of the Reporting Date.
