BASED ON A CURRICULUM
OVERVIEW SAMPLE AUTHORED BY
Centennial School District
Gilbert Apodaca
Jefferson County School District
Dawn Jones
Adams 12 School District
Rustie Robison

This unit was authored by a team of Colorado educators. The template provided one example of unit design that enabled teacher-authors to organize possible learning experiences, resources, differentiation, and assessments. The unit is intended to support teachers, schools, and districts as they make their own local decisions around the best instructional plans and practices for all students.

DATE POSTED: NOVEMBER 7, 2014
## Colorado Teacher-Authored Sample Instructional Unit

</tr>
</tbody>
</table>
## Critical Content:

**My students will Know...**

- How the ideas and beliefs about genetics have developed over time as new technologies and applications have been developed. (SC09-GR.8-S.2-GLE.2-EO.a,b,c; RA.1; N.2)
- The role of environment in the expression of genes. (SC09-GR.8-S.2-GLE.2-EO.c,d,e; N.1,3)
- The classification of genotype and phenotype based on parent genotype and phenotype (including sex-linked traits, pedigrees, co-dominance, and karyotype). (SC09-GR.8-S.2-GLE.2-EO.d,e)
- The definition and uses of a Punnett Square. (SC09-GR.8-S.2-GLE.2-EO.d,e)

## Key Skills:

**My students will be able to (Do)...**

- Critically evaluate the benefits and risks of the technology associated with genetics. (SC09-GR.8-S.2-GLE.2-EO.a,b,c; RA.1; N.2)
- Evaluate various models of DNA inheritance and genes based strengths and weaknesses (SC09-GR.8-S.2-GLE.2-EO.c,d,e; N.1,3)
- Develop, communicate, and justify an evidence based scientific explanation for passing genetic information from one generation to the next. (SC09-GR.8-S.2-GLE.2-EO.a,b,c; N.1,2)
- Use models, diagrams, and computer simulations to predict offspring phenotypes and genotypes based on parent genotypes. (SC09-GR.8-S.2-GLE.2-EO.d,e)

## Critical Language:

includes the Academic and Technical vocabulary, semantics, and discourse which are particular to and necessary for accessing a given discipline.

**EXAMPLE:** A student in Language Arts can demonstrate the ability to apply and comprehend critical language through the following statement: "Mark Twain exposes the hypocrisy of slavery through the use of satire."

A student in ________ can demonstrate the ability to apply and comprehend critical language through the following statement(s):

- Traits of individuals are influenced by genes and/or environment (SC09-GR.8-S.2-GLE.2)

## Academic Vocabulary:

- simulation, analyze, interpret, evidence (direct and indirect), scientific investigation, distinguishing characteristics, models, critique, evaluate, compare and contrast

## Technical Vocabulary:

- traits, biotechnology, heredity, RNA (ribonucleic acid), DNA (deoxyribonucleic acid), phenotype, genotype, Punnett square, dominant, recessive, genetic technology, gene
## Unit Description:
This unit is focused on genetics and the transmission of traits. Beginning with using Punnett squares and pedigrees to predict possible offspring, the unit has students investigate Mendelian genetics, genetic engineering and modification, and the transmission and mutation of traits during reproduction. The unit culminates in a performance assessment that asks students to write an opinion/position paper for a local newspaper on one topic (GMOs, cloning, genetic counseling, etc.).

## Considerations:
Teachers need to consider that some of the topics within this unit could be controversial and should proceed as the district requires.

## Key Generalization:
Human technology and activities can alter systems of heredity and interaction which could impact society for future generations

## Performance Assessment: The capstone/summative assessment for this unit.

### Claims:
(Key generalization(s) to be mastered and demonstrated through the capstone assessment.)

| Human technology and activities can alter systems of heredity and interaction which could impact society for future generations. |

### Stimulus Material:
(Engaging scenario that includes role, audience, goal/outcome and explicitly connects the key generalization)

You are preparing an opinion piece for a local newspaper on one topic related to genetics and community welfare (e.g., GMOs, cloning, genetic screening) to share with the general public. You could for example be a geneticist, a parent, a farmer, etc. You must research case studies on your topic and utilize scientific findings to assist you in defending your position (include a minimum of three sources). You must also use relevant background genetic information pertaining to your specific topic.

http://writetodone.com/how-to-write-a-strong-opinion-piece-for-your-blog/ (Steps for how to write a strong opinion piece)

### Product/Evidence:
(Expected product from students)

Students must write a persuasive essay/position paper on one topic (GMOs, cloning, genetic counseling, etc.). They must have researched case studies on their topic and included at least three reputable sources. Students also must include relevant genetic information pertaining to their topic (e.g., mutations, genetic variation, probability, pedigrees).

### Differentiation:
(Multiple modes for student expression)

- The teacher may provide some sources for the students on the topics suggested.
- The teacher may provide a template for writing the opinion paper.
- The teacher may provide a checklist.
- The teacher may allow students to select a perspective such as a geneticist, a parent, a doctor, a farmer, etc.
- To extend this work, students may prepare a script for a 10minute “TED talk” to share with general public.

## Texts for independent reading or for class read aloud to support the content

<tr>
<td>Skills: Comprehension of academic vocabulary Extracting main ideas Making predictions Identifying key points and themes Identify faults in research methods, logic, and statistical findings Scrutinize credibility of sources</td>
<td>Assessment: Students will prepare lab write-ups for various experiences. <a href="http://science-curriculum.lakecounty-hs.schoolfusion.us/modules/locker/files/group_files.phtml?parent=24482304&amp;gid=4402063&amp;sessionid=c1305047b374753db7924f5a8ebb7b18">http://science-curriculum.lakecounty-hs.schoolfusion.us/modules/locker/files/group_files.phtml?parent=24482304&amp;gid=4402063&amp;sessionid=c1305047b374753db7924f5a8ebb7b18</a> (Lab Write-Up Rubrics)</td>
<td></td>
</tr>
</tbody>
</table>

### Prior Knowledge and Experiences

Students must have a basic understanding of cell structure and function, reproduction, DNA, percentages, ratio, and fractions.

Vertical alignment of life science: Students have last seen concepts related to this unit in 5th, 4th, 3rd, and 1st grades.

### Learning Experiences # 1 – 4

**Instructional Timeframe: Weeks 1-2**

### Learning Experience # 1

The teacher may use simulations/media about the meiotic process so that students can begin modeling (e.g., using pipe cleaners, string) the principles of sex determination.

**Generalization Connection(s):** An organism's variation reflects heredity due to the nature of genetics Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring

**Teacher Resources:**
- [http://naturalsciences.sdsu.edu/classes/lab2.5/lab2.5.html#anchor29709092](http://naturalsciences.sdsu.edu/classes/lab2.5/lab2.5.html#anchor29709092) (Modeling meiosis lab)
## Student Resources:

- [http://www.cellsalive.com](http://www.cellsalive.com) (Interactive site where students can look inside cells)
- [http://www.sumanasinc.com/webcontent/animations/content/meiosis.html](http://www.sumanasinc.com/webcontent/animations/content/meiosis.html) (Meiosis animation)

## Assessment:

Students will create a model of the process and products of meiosis.
- [http://www.youtube.com/watch?v=XpZxNCVjPpE](http://www.youtube.com/watch?v=XpZxNCVjPpE) (You tube video of meiosis model using clay)

## Differentiation:

(Multiple means for students to access content and multiple modes for student to express understanding.)

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>The teacher may provide a meiosis chart to allow the students to follow along visually</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The teacher may allow students to work with peers to complete the lab</td>
</tr>
<tr>
<td>The student may verbally demonstrate their understanding of meiosis one-on-one with the teacher</td>
<td></td>
</tr>
</tbody>
</table>

## Extensions for depth and complexity:

Access (Resources and/or Process)

- The teacher may ask the student to compare and contrast mitosis with meiosis
- The student may create a model for comparing mitosis and meiosis

## Critical Content:

- DNA
- Centriole
- Nucleus
- Nuclear membrane
- Meiosis
- Sex cell
- Gamete
- Prophase
- Metaphase
- Anaphase
- Telophase
- Chromosome
- Zygote
- Daughter cells

## Key Skills:

- Model the process of meiosis

## Critical Language:

- DNA, Centriole, Nucleus, Nuclear membrane, Meiosis, Sex cell, Gamete, Prophase, Metaphase, Anaphase, Telophase, Chromosome, Zygote, Daughter cells, Sequencing, Model
## Learning Experience # 2

The teacher may introduce the concepts of genotype and phenotype so that students can recognize the various forms of their representation (i.e., as variables and as written forms-descriptive words).

### Generalization Connection(s):
- An organism’s variation reflects heredity due to the nature of genetics
- Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring

### Teacher Resources:
- [http://sciencespot.net/Media/gen_smilewkst1.pdf](http://sciencespot.net/Media/gen_smilewkst1.pdf)  (Activity with alleles)
- [https://docs.google.com/file/d/0Bz9eBjqflfDX3Vvb2FzeG5JUVE/edit?pli=1](https://docs.google.com/file/d/0Bz9eBjqflfDX3Vvb2FzeG5JUVE/edit?pli=1)  (Genotype and Phenotype lab)

### Student Resources:
- [https://www.kaskaskia.edu/BCambron/Biology%20101/Writing%20Phenotypes%20and%20Genotypes.htm](https://www.kaskaskia.edu/BCambron/Biology%20101/Writing%20Phenotypes%20and%20Genotypes.htm)  (How to write genotypes and phenotypes)

### Assessment:
Students will complete a set of example statements to determine whether a statement is describing a phenotype or genotype.

### Differentiation:
(Multiple means for students to access content and multiple modes for student to express understanding.)

#### Access (Resources and/or Process)
- The teacher may provide a cloze model to assist students in their determinations

#### Expression (Products and/or Performance)
- The student may work one-on-one with a teacher and point to (or verbally describe) the correct answers

### Extensions for depth and complexity:

#### Access (Resources and/or Process)
- The teacher may provide opportunities for students to create their own examples

#### Expression (Products and/or Performance)
- The student creates their own examples of phenotypes and genotypes based on what has been determined to be dominant and recessive traits

### Critical Content:
- Alleles
- Gene
- Recessive
- Dominant
- Genotype
- Phenotype
- Homozygous
- Heterozygous
- Gene expression

### Key Skills:
- Differentiating between genotype and phenotype
- Comparing/contrasting various traits
- Determining dominant versus recessive traits

### Critical Language:
- Alleles, Gene, Recessive, Dominant, Genotype, Phenotype, Homozygous, Heterozygous, Gene expression, Differentiating, Comparing/Contrasting, Determining
## Learning Experience # 3

The teacher may discuss differences between dominant and recessive alleles so that students can evaluate and differentiate various phenotypes and genotypes in order to make determinations about dominant and recessive traits.

### Generalization Connection(s):
An organism’s variation reflects heredity due to the nature of genetics. Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring.

### Teacher Resources:
- [http://sciencespot.net/Media/gen_smilewkst1.pdf](http://sciencespot.net/Media/gen_smilewkst1.pdf) (Activity with alleles)
- [https://docs.google.com/file/d/0Bz9eBjqfJfDX3VVvb2FzeG5JUVE/edit?pli=1](https://docs.google.com/file/d/0Bz9eBjqfJfDX3VVvb2FzeG5JUVE/edit?pli=1) (Genotype and Phenotype lab)

### Student Resources:
- [https://www.kaskaskia.edu/BCambron/Biology%20101/Writing%20Phenotypes%20and%20Genotypes.htm](https://www.kaskaskia.edu/BCambron/Biology%20101/Writing%20Phenotypes%20and%20Genotypes.htm) (How to write genotypes and phenotypes)

### Assessment:
Students will research up to 10 traits to determine which are dominant and recessive and provide the corresponding genotype and phenotype for those traits.

### Differentiation:
(Multiple means for students to access content and multiple modes for student to express understanding.)

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may provide a cloze model to assist students in their determinations <a href="http://worksheets.theteacherscorner.net/make-your-own/fill-in-the-blank/">http://worksheets.theteacherscorner.net/make-your-own/fill-in-the-blank/</a> (The teacher corner cloze worksheet creator)</td>
<td>The student may work one-on-one with a teacher and point to the correct answers</td>
</tr>
</tbody>
</table>

### Extensions for depth and complexity:

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may provide opportunities for students to research more obscure traits to determine which are dominant versus recessive</td>
<td>The student may share results of what has been determined to be dominant and recessive traits</td>
</tr>
</tbody>
</table>

### Critical Content:
- Alleles
- Gene
- Recessive
- Dominant
- Genotype
- Phenotype
- Homozygous
- Heterozygous
- Gene expression

### Key Skills:
- Differentiating between genotype and phenotype
- Comparing/contrasting various traits
- Determining dominant versus recessive traits

### Critical Language:
Alleles, Gene, Recessive, Dominant, Genotype, Phenotype, Homozygous, Heterozygous, Gene expression, Differentiating, Comparing/Contrasting, Determining
## Learning Experience # 4

The teacher may lead an investigation on probability (e.g., using coin-flips, die throws) so that students can begin to consider the connections between probabilities and inherited traits.

### Generalization Connection(s):

An organism’s variation reflects heredity due to the nature of genetics. Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring.

### Teacher Resources:

- [http://mypages.iit.edu/~smile/bi8602.html](http://mypages.iit.edu/~smile/bi8602.html) (Beans and Genes probability activity)

### Student Resources:

- [http://www.mathsisfun.com/data/probability.htm](http://www.mathsisfun.com/data/probability.htm) (Different representations of probability)
- [https://www.youtube.com/watch?v=Sqq4k50dxbI](https://www.youtube.com/watch?v=Sqq4k50dxbI) (You tube video on probability)

### Assessment:

Students complete a data table and a graph documenting probability outcomes from the lab.

- [http://www.mathsisfun.com/data/](http://www.mathsisfun.com/data/) (Math is fun probability tables and graphs)
- [https://www.google.com/search?q=probability+data+table+and+graphs&biw=1366&bih=648&tbm=isch&tbo=u&source=univ&sa=X&ei=--HLXSHSbXSYbQAO-AK4Dw&ved=0CCsQsAQ](https://www.google.com/search?q=probability+data+table+and+graphs&biw=1366&bih=648&tbm=isch&tbo=u&source=univ&sa=X&ei=--HLXSHSbXSYbQAO-AK4Dw&ved=0CCsQsAQ) (Images of probability tables and graphs)

### Differentiation:

(Multiple means for students to access content and multiple modes for student to express understanding.)

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may provide math manipulatives to assist with fractions and percentages</td>
<td>The student may partner with another student to complete data table and graph</td>
</tr>
</tbody>
</table>

### Extensions for depth and complexity:

<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may ask students to predict the outcome of the lab</td>
<td>The student may make predictions about what the outcome of the lab will be prior to completing the lab</td>
</tr>
</tbody>
</table>

### Critical Content:

- Probability
- Percentage
- Fraction
- Outcome

### Key Skills:

- Calculating probability

### Critical Language:

Probability, Percentage, Fraction, Outcome, Calculating
## Learning Experience # 5

The teacher may utilize a statistical lab on alleles (e.g., Punnett Squares) so that students can experiment with predicting the probability of phenotypes, such as attached earlobes, widow’s peak, dimples, etc.

### Generalization Connection(s):
An organism’s variation reflects heredity due to the nature of genetics
Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring

</table>
### Extensions for depth and complexity:

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may allow the student to survey the class, collect data on the class’ facial phenotypes, and make predictions on genotype. The teacher may provide more alleles for the students to use in the Punnett square (e.g., 8x8, 10x 10)</td>
<td>The student may create a data table of phenotypes, listing predicted genotypes, and supporting their rationale for their predictions. The student may complete more complex Punnett Squares involving multiple alleles at one time.</td>
</tr>
</tbody>
</table>

### Critical Content:

- Phenotype
- Allele
- Gene
- Dominant
- Recessive
- Heterozygous
- Homozygous
- Gene expression

### Key Skills:

Analyzing allele combinations

### Critical Language:

Phenotype, Allele, Genotype, Dominant, Recessive, Heterozygous, Homozygous, Gene expression, Analyzing allele combinations

### Learning Experience # 6

**The teacher may introduce more complex ways to model gene expression (an expanded Punnett square and pedigree) so that students can explore sex-linked traits and make determinations on how they are inherited.**

**Generalization Connection(s):**

An organism’s variation reflects heredity due to the nature of genetics. Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring.

**Teacher Resources:**

**Student Resources:**

- [https://www.khanacademy.org/science/biology/heredity-and-genetics/v/sex-linked-traits](https://www.khanacademy.org/science/biology/heredity-and-genetics/v/sex-linked-traits) (Khan Academy genetics lesson)
- [http://www.youtube.com/watch?v=Ir1t9awmUI4](http://www.youtube.com/watch?v=Ir1t9awmUI4) (Understanding pedigrees movie)

**Assessment:**

Students will complete pedigrees based on case studies of families carrying sex-linked traits.

### Student Resources:
- [http://www.hobart.k12.in.us/jkousen/Biology/inccodom.htm](http://www.hobart.k12.in.us/jkousen/Biology/inccodom.htm) (Notes page on co-dominance and incomplete dominance)

### Assessment:
Students will complete pedigrees based on case studies of families carrying co-dominant traits and provides written rationale for their pedigree choices.
- [http://chroma.gs.washington.edu/outreach/genetics/sickle/sickle-back.html](http://chroma.gs.washington.edu/outreach/genetics/sickle/sickle-back.html) (Sickle Cell case study)
- [https://www.google.com/search?q=co-dominance&es_sm=93&biw=1093&bih=534&tbn=isch&tbo=u&source=univ&sa=X&ei=-BtAVLOYNqfg8gGZj4HoBw&sqi=2&ved=0CCsQsAQ#tbm=isch&q=co-dominance+pedigrees](https://www.google.com/search?q=co-dominance&es_sm=93&biw=1093&bih=534&tbn=isch&tbo=u&source=univ&sa=X&ei=-BtAVLOYNqfg8gGZj4HoBw&sqi=2&ved=0CCsQsAQ#tbm=isch&q=co-dominance+pedigrees) (Images for co-dominant pedigrees)

### Differentiation:
(Multiple means for students to access content and multiple modes for student to express understanding.)

#### Access (Resources and/or Process)
- The teacher may provide a scaffold of the case study selected (e.g., cloze, word bank)
- The teacher may provide students with co-dominance information without having them read a case study

#### Expression (Products and/or Performance)
- The student may complete a pedigree for co-dominance and verbally explain their rationale

### Extensions for depth and complexity:

#### Access (Resources and/or Process)
- The teacher may provide opportunities for students to extend co-dominance (e.g., exploring incomplete dominance)

#### Expression (Products and/or Performance)
- The student may report out on the results between co-dominance and incomplete dominance (e.g., written report, Power Point presentation)

### Critical Content:
- Co-dominance
- Dominant
- Recessive
- Allele
- Homozygous
- Heterozygous
- Gene
- Gene expression
- Punnett square
- Pedigree
- Probability

### Key Skills:
- Calculating probability
- Creating a pedigree
- Using deductive reasoning

### Critical Language:
Co-dominance, Dominant, Recessive, Allele, Homozygous, Heterozygous, Gene, Gene expression, Punnett square, Pedigree, Probability, Ratio, Calculating probability and ratios, Deduction, Inference
Learning Experience # 8

The teacher may create an investigation around mutations so that students can explore and explain how mutations can lead to the development of new traits.

| Generalization Connection(s): | An organism’s variation reflects heredity due to the nature of genetics
|                             | Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring
|                             | Human technology and activities can alter systems of heredity and interaction which could impact society for future generations

| Teacher Resources:            | http://www.ndsu.edu/pubweb/~mcclean/plsc431/popgen/popgen4.htm (Evolutionary genetics)
|                             | http://evolution.berkeley.edu/evolibrary/article/0_0_mutations_05 (Understanding mutations)

| Student Resources:            | http://kidshealth.org/teen/your_body/healthbasics/genes_genetic_disorders.html# (Kids Health on genetic disorders)
|                             | http://www.nhs.uk/Conditions/Genetics/Pages/Facts.aspx (Facts pages on genetics)
|                             | http://dictionary.kids.net.au/word/mutation (Kids dictionary)

| Assessment:                  | Students will create visual representations of traits before and after the mutations have occurred.
|                             | http://www.bio.miami.edu/dana/dox/wildtype.html (Wild type versus mutation expressions)

| Differentiation:             | Access (Resources and/or Process) | Expression (Products and/or Performance)
|                             | The teacher may provide students with a graphic organizer to capture their thinking on mutations
|                             | The teacher may allow students to work in pairs
|                             | The student may complete a graphic organizer as their visual representation

| Extensions for depth and complexity: | Access (Resources and/or Process) | Expression (Products and/or Performance)
|                                     | The teacher may allow students to investigate why some mutations are more prevalent in some races, but not others
|                                     | The student may report their findings about mutations linked to race

| Critical Content:            | • The development of ideas and beliefs about genetics over time (with the advent of new technologies and applications)
|                             | • The role of environment in the expression of genes
|                             | • Development of GMOs and their pros and cons
|                             | • Mutations and the their influence on birth effects
|                             | • Natural mutations vs. technologically induced mutations
**Key Skills:**
- Critically evaluate the benefits and risks of the technology associated with genetics
- Evaluate various models of DNA inheritance and genes based strengths and weaknesses
- Develop, communicate, and justify an evidence based scientific explanation for passing genetic information from one generation to the next

**Critical Language:**
- Simulation, Analyze, Interpret, Evidence (direct and indirect), Scientific investigation, Distinguishing characteristics, Models, Compare and contrast, Traits, Biotechnology, Heredity, RNA (ribonucleic acid), DNA (deoxyribonucleic acid), Phenotype, Genotype, Genetic technology, Gene

### Learning Experience # 9

The teacher may introduce examples of genetic mutations so that students can delineate specific ways mutations can be beneficial and/or harmful. Teacher note: students can apply these examples to generational mutations in organisms such as aphids, bacteria, etc.

**Generalization Connection(s):**
- Organisms interact to reproduce and transmit genetic information to offspring, which is then, in turn, passed to future offspring
- An organism’s variation reflects heredity due to the nature of genetics
- Human technology and activities can alter systems of heredity and interaction which could impact society for future generations

**Teacher Resources:**
- [http://www.nhs.uk/Conditions/Genetics/Pages/Facts.aspx](http://www.nhs.uk/Conditions/Genetics/Pages/Facts.aspx) (Genetics fact sheet)

**Student Resources:**
- [http://evolution.berkeley.edu/evolibrary/article/mutations_07](http://evolution.berkeley.edu/evolibrary/article/mutations_07) (Berkeley article on mutations)

**Assessment:**
- Students will complete a short constructed response including graphs and models analyzing a case study and emphasizing the resulting genotype/phenotype from the mutations.

**Differentiation:**
- Access (Resources and/or Process)
  - The teacher may provide students with a writing template
  - The teacher may provide a shortened version of the case study

- Expression (Products and/or Performance)
  - The student may create a visual representation of their response to the case study
  - The student may create a presentation to share their results/research with the class

**Extensions for depth and complexity:**
- Access (Resources and/or Process)
  - The teacher may allow students to research a case study of their choice of mutations in plants and specifically look for commonalities to human mutations

- Expression (Products and/or Performance)
  - The student may create a presentation to share their results/research with the class

**Critical Content:**
- The development of ideas and beliefs about genetics over time (with the advent of new technologies and applications)
- The role of environment in the expression of genes
- Genetic mutations of insects on alternating generations (development of wings)
# Colorado Teacher-Authored Sample Instructional Unit

## Key Skills:
- Critically evaluate the benefits and risks of the technology associated with genetics
- Evaluate various models of DNA inheritance and genes based strengths and weaknesses
- Develop, communicate, and justify an evidence based scientific explanation for passing genetic information from one generation to the next
- Use models, diagrams, and computer simulations to predict offspring phenotypes and genotypes based on parent genotypes

## Critical Language:
- Analyze, Interpret, Evidence (direct and indirect), Scientific investigation, Distinguishing characteristics, Models, Critique, Compare and contrast, Traits, Biotechnology, Heredity, RNA, DNA, Phenotype, Genetic technology, Gene

## Learning Experience # 10

The teacher may provide opportunities to explore multiple perspectives on human manipulation of genes (i.e., jigsaw, case studies on GMOs, cloning, genetic screening) so that students can develop insight on and synthesize various perspectives around intentional genetic mutation.

### Generalization Connection(s):
- Human technology and activities can alter systems of heredity and interaction which could impact society for future generations

### Teacher Resources:
- [http://www.globalchange.com/geneticengin.htm](http://www.globalchange.com/geneticengin.htm) (Genetic engineering)

### Student Resources:
- [http://tiki.oneworld.org/genetics/GE6.html](http://tiki.oneworld.org/genetics/GE6.html) (Grade 6 genetics article)
- [http://tiki.oneworld.org/genetics/GE7.html](http://tiki.oneworld.org/genetics/GE7.html) (Grade 7 genetics article)
- [http://swcoalition.org/2013/09/gmo-case-studies/](http://swcoalition.org/2013/09/gmo-case-studies/) (Case study on GMO)
- [http://www.abc.net.au/science/slab/consconf/studies.htm](http://www.abc.net.au/science/slab/consconf/studies.htm) (case study genetics)

### Assessment:
- Students will write a summary of one of the case studies (or jigsaw) and provide their personal opinion about what they read.
  - [http://writetodone.com/how-to-write-a-strong-opinion-piece-for-your-blog/](http://writetodone.com/how-to-write-a-strong-opinion-piece-for-your-blog/) (Steps for how to write a strong opinion piece)

### Differentiation:
- **Access** (Resources and/or Process)
  - The teacher may provide readings that are in various Lexile ranges (e.g., Genetic Engineering - M. Cohen [lexile level 840], Traits and Attributes - N. Hyde [lexile level 860])

- **Expression** (Products and/or Performance)
  - The student may dictate their opinion piece to a teacher
