

## SPECIAL CIRCUMSTANCE CODES

---

In order to apply a special circumstance code, a testlet must first be generated for the student. The following steps must be completed before a testlet is generated by the Educator Portal System.

1. The student must be enrolled in DLM's Educator Portal
2. The student is assigned to a roster for a specific teacher
3. The teacher completes the PNP and First Contact Survey in Educator Portal
4. The system generates the first testlet

The Test Administrator must complete ALL the DLM trainings in the DLM training site (Moodle) to access the roster. For more information on how to complete the above steps, please see the DLM Data Management Manual at <http://dynamiclearningmaps.org/colorado>.

## REASONS FOR NOT TESTING

If a student cannot participate in a testlet that generates a performance level used for federal and state accountability, a DLM special circumstance code can be entered in the Educator Portal to explain why the student was not tested. A crosswalk with codes used in Colorado can be found on page 6 of this document.

Special circumstance codes are specific to test sessions in the spring assessment window only. The codes are descriptive words (e.g. Medical Waiver or Parental Refusal). A special circumstance code can be applied to, edited, or removed from a test session in a subject at any time during the state's spring assessment window, but the action must be performed before the window closes.

The code must be entered for each applicable subject. In other words, if a student is not testing in any subjects, a code must be applied to a testlet in each subject to which the student is rostered. If later the code must be edited or removed for all subjects, the action must be performed for the code that was entered. The actions must be taken before the close of the spring assessment window.

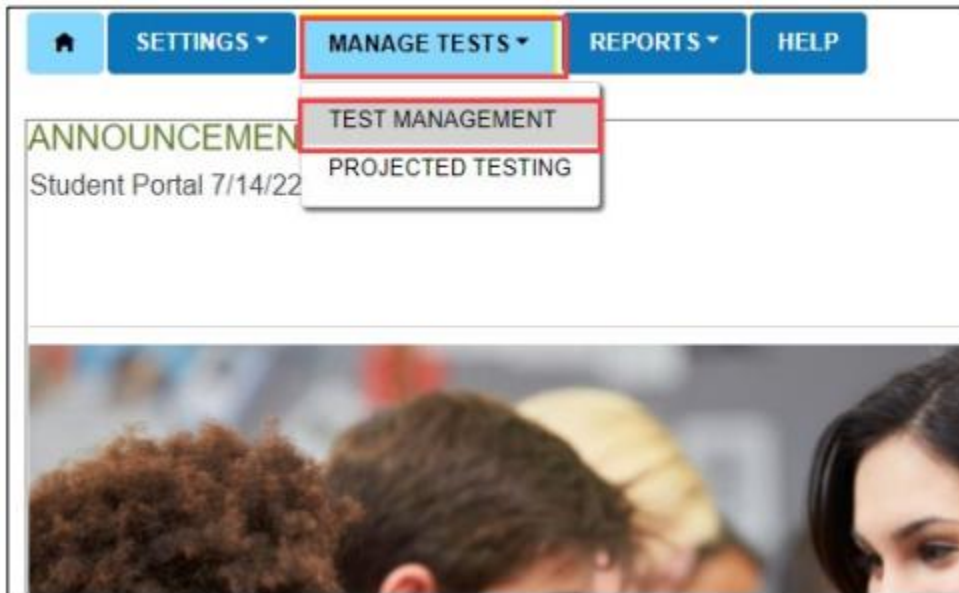

---

Note: Entering a special circumstance code does not prevent further testing.

## On Demand Special Circumstance Code Extract

For states that allow the use of special circumstance codes during their spring assessment window, the DLM On-Demand Special Circumstance extract is available for monitoring the codes that are added during the window (Figure 1). The extract is available to the same roles that have permission to add the codes. To learn how to access this extract, go to the Educator Portal User Guide > Access Reports and Extracts.
