

Glossary

To promote the use of consistent terminology among educational team members when discussing educational interpreting services for students, the following glossary has been provided.

American Sign Language

A widespread misconception about American Sign Language (ASL) is the belief that it is a signed version of English. In fact ASL does not have the grammar or syntax of English. It is a distinct language with a discrete and singular grammar and syntax. An important hallmark of ASL is the “voice-off” feature that discourages speaking and signing simultaneously. Speaking English and signing ASL at the same time does not provide accurate communication in both languages. ASL is sometimes called the natural language of people who are deaf and hard of hearing. A “natural” language, in linguistic terms, is one that’s learned as a first language in childhood. Yet, not all deaf and hard of hearing people learn ASL as their first language. Some use it as a second language, while others use very little ASL, if any. It is more accurate to say that ASL is a natural language for deaf and hard of hearing individuals because it evolved through use by people who were deaf and hard of hearing.

Community Interpreter

Interpreters for the deaf and hard of hearing who work outside of education settings are referred to as community interpreters. Interpreters working among the general public are **certified** through the Registry of Interpreters for the Deaf (RID) and abide by a set of ethical principles set forth by RID. Occasionally a school district or BOCES contracts with an interpreting agency for the services of a community interpreter to act as a substitute for an educational interpreter. In these cases, the community interpreter is required to hold CDE Authorization for interpreting in an education setting in addition to their RID certification. See [HOUSE BILL 18-1108](#)

Cued Speech

Cued Speech is a system of communication used with deaf or hard of hearing people. It is not a language, but it supplements any language with eight different handshapes (representing consonants) and four different positions near the mouth (representing vowels) to allow an individual with hearing loss to differentiate among sounds that look alike when seen on the lips. Cued speech is a mode of communication based on the phonemes and properties of traditionally spoken languages. Cueing allows consumers who are deaf or hard of hearing or who have

Glossary

language/communication disorders to access the basic, fundamental properties of spoken languages through the use of vision. Because of the emphasis on phoneme identification, proponents of cued speech argue that it is ideally designed to support the goal of improving the reading abilities of the student through better comprehension of the phonemes of English

Deafblind Interpreting

In Colorado, interpreters for persons who are deafblind are CDE Authorized interpreters who have had advanced training in working with deafblind individuals. Communication is made

possible by individualizing the method of interpreting to access the student's strengths. Following is a brief description of four types of deafblind interpreting.

Tracking: If a student has sufficient residual vision, the interpreter can communicate by signing in very close proximity to the student while the student may hold the wrists of the interpreter to keep the signs within his limited field of vision.

Hand-over-Hand: The student's hands are placed lightly on the back of the interpreter's hands while he/she signs. The student is able to "read" the signs through touch and movement.

Tactile Fingerspelling: This method allows the student to receive the message as the interpreter fingerspells words into the student's hand.

Tracing: The interpreter traces block alphabet letters onto the palm of the student.

Educational Interpreter

Interpreters for the deaf and hard of hearing who work as a related service provider in a school setting are referred to as educational interpreters. The educational interpreter serves as a link between the deaf student and individuals who are speaking to communicate (i.e., the teacher, classmates, or other school personnel). A well-trained educational interpreter has the ability to provide interpreting services in a variety of modes of communication. This is a necessary skill because the preferred mode of communication of students with hearing impairments varies, possibly requiring an interpreter to employ their knowledge of American Sign Language, Pidgin Sign English, Oral Transliteration, or Cued Speech in a given school year. Regardless of the mode used, the primary responsibility of the interpreter is to make communication as clear as possible for the student and for those who interact with the student.

Fingerspelling

Fingerspelling is the representation of English alphabet letters and numerals using only one hand to represent a single number or a series of letters to form a spoken/written word or name from another language other than American Sign Language (e.g., English, Spanish, French, etc.).

Manually Coded English (MCE)

MCE sign systems were developed to represent the vocabulary and grammar of spoken English

Glossary

using signs. These systems combine signs from ASL and create new signs for words and grammar that do not exist in ASL. Signing uses the grammar of spoken English. MCE systems vary in the degree they represent prefixes, suffixes, grammatical function words (e.g., prepositions, pronouns, and articles), and other words that do not exist as words in ASL. Some MCE systems try to represent all aspects of English (SEE) and others borrow more signs from ASL, but not the grammar of ASL (CASE, PSE).

Oral Interpreting

Oral interpreting is a recognized subspecialty of interpreting. Many deaf and hard of hearing people “read lips” as their preferred mode of communication. An oral interpreter presents on the lips and face what is being said to the deaf or hard of hearing consumer. The interpreter does this skillfully by silently mouthing the message, using pace, facial expressions, natural gestures, and the purposeful substitution of easy to speechread words for those that are difficult to recognize on the lips, while still maintaining the intent of the speaker.

Pidgin Signed English (PSE)

A pidgin language results when some of the characteristics of two separate languages are combined to produce a third common language. Pidgin Signed English (sometimes referred to as CASE- Conceptually Accurate Signed English) combines the signs, facial expressions, and body language of ASL with word order of the English language but not all words are signed, so it is not an exact representation of English or ASL. PSE is not a true language, so there are no set rules for grammar and syntax. Pidgin Signed English is widely used in education settings because it is easier for English speaking adults to learn the vocabulary of an unfamiliar language (i.e. ASL) than to learn entirely new rules for grammar and syntax. This sign system enables hearing people to use the sign vocabulary of ASL in the familiar word order of English and acts as a bridge between two established languages. Pidgin Signed English is used by the majority of educational interpreters, hearing parents, teachers, speech therapists, and other hearing individuals in a deaf or hard of hearing student’s world.

Sign Language

Sign language is a general term that covers a variety of sign language systems used in education settings. A form of communication that is conveyed through the use of hand shapes; orientation and movement of the hands, arms, or body; and facial expressions. In the literature, any visual form of spoken language (e.g., ASL, PSE, SEE) might be referred to as “manualism.”

Signing Exact English (SEE)

Signing Exact English (SEE) was created to be a code for visually represented spoken English. It is an artificial system that takes much of its vocabulary of signs from American Sign Language and employs modified ASL handshapes using the first letter of the English word to create a new SEE sign (e.g., a /d/ handshape tapping the mouth represents “dinner”).

Additionally, many newly invented signs are incorporated to specify grammatical concepts such as the use of articles and prepositions. Markers such as prefixes, suffixes, plural endings, and tenses

Glossary

have discrete signs in the SEE system, as do definite and indefinite articles. A typical sentence signed with the SEE system would be in exact English word order with some additional signs for conventions such as the “-ing” word ending.

Simultaneous Communication (SimCom)

Sometimes referred to as Sign Supported Speech (SSS), simultaneous communication is a technique sometimes used when spoken language (e.g., English) and a manual variant of that

language (e.g., PSE, SEE) are used at the same time. The practice of simultaneous communication in an education setting is frequently referred to as “total communication” – an erroneous statement. The technique of simultaneous communication should not be used interchangeably with the philosophy of total communication. (See “total communication”)

Total Communication

Total Communication (TC) is the title of a philosophy of communication. It is not a method or a mode of communication. Total Communication may employ more than one mode (manual, oral, auditory, and written), depending on the particular needs of the child at a given stage in the child’s language development.

**EDUCATION - PUBLIC
SCHOOLS HOUSE BILL 96-
1041**

BY REPRESENTATIVES Keller, Kerns, Sullivan, Sullivant, Armstrong, Chlouber, Clarke, Dean, Friednash, Gordon, Kaufman, Knox, Lyle, Mace, McElhany, Morrison, Nichol, Reeser, Saliman, Snyder, and Tucker; also SENATORS Hopper, Meiklejohn, Feeley, Hernandez, Johnson, Martinez, Matsunaka, Pascoe, Perlmutter, Rupert, and Tanner.

An Act

CONCERNING THE EDUCATION OF CHILDREN WHO ARE DEAF AND HARD OF HEARING.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly finds that:

(a) Pupils with low-incidence disabilities, as a group, make up less than one percent of the total statewide enrollments for kindergarten through grade twelve; and

(b) Pupils with low-incidence disabilities require highly specialized services, equipment, and materials.

(2) The general assembly further finds that:

(a) Deafness involves the most basic of human needs: The ability to communicate with other human beings. Many deaf and hard-of-hearing children use an appropriate communication mode, sign language, which may be their primary language, while others express and receive language orally and aurally, with or without visual signs or clues. Still others, typically young deaf and hard-of-hearing children, lack any significant language skills. It is essential for the well-being and growth of deaf and hard-of-hearing children that educational programs recognize the unique nature of deafness and ensure that all deaf and hard-of-hearing children have appropriate, ongoing, and fully accessible educational opportunities.

(b) It is essential that deaf and hard-of-hearing children, like all children, have an education in which their unique communication mode is respected, utilized, and developed to an appropriate level of proficiency;

(c) It is essential that deaf and hard-of-hearing children have an education in which teachers of the deaf and hard of hearing, psychologists, speech therapists, assessors, administrators, and other special education personnel understand the unique nature of deafness and are specifically trained to work with deaf and hard-of-hearing pupils. It is essential that deaf and hard-of-hearing children have an education in which teachers of the deaf and hard of hearing are proficient in the primary language mode of those children.

Appendices

(d) It is essential that deaf and hard-of-hearing children, like all children, have an education with a sufficient number of language mode peers with whom they can communicate directly and who are of the same, or approximately the same, age and ability level;

(e) It is essential that deaf and hard-of-hearing children have an education in which their parents and, where appropriate, deaf and hard-of-hearing people are involved in determining the extent, content, and purpose of programs;

(f) Deaf and hard-of-hearing children would benefit from an education in which they are exposed to deaf and hard-of-hearing role models;

(g) It is essential that deaf and hard-of-hearing children, like all children, have programs in which they have direct and appropriate access to all components of the educational process, including, but not limited to, recess, lunch, and extracurricular social and athletic activities;

(h) It is essential that deaf and hard-of-hearing children, like all children, have programs in which their unique vocational needs are provided for, including appropriate research, curricula, programs, staff, and outreach;

(i) Each deaf or hard-of-hearing child should have a determination of the least restrictive environment that takes into consideration these legislative findings and declarations;

(j) Given their unique communication needs, deaf and hard-of-hearing children would benefit from the development and implementation of state and regional programs for children with low-incidence disabilities.

SECTION 2. 22-20-103, Colorado Revised Statutes, 1995 Repl. Vol., is amended BY THE ADDITION OF A NEW SUBSECTION to read:

22-20-103. Definitions. As used in this article, unless the context otherwise requires: (1.7) "COMMUNICATION MODE OR LANGUAGE" MEANS ONE OR MORE of the following

systems or methods of communication applicable to deaf and hard-of hearing children:

(a) AMERICAN SIGN LANGUAGE;

(b) ENGLISH-BASED MANUAL OR SIGN SYSTEMS; OR

(c) ORAL, AURAL, OR SPEECH-BASED TRAINING.

SECTION 3. 22-20-108, Colorado Revised Statutes, 1995 Repl. Vol., is amended BY THE ADDITION OF A NEW SUBSECTION to read:

22-20-108. Determination of disability - enrollment. (4.7) (a) IN DEVELOPING AN INDIVIDUAL EDUCATIONAL PROGRAM PURSUANT TO SUBSECTION (4) OF THIS SECTION FOR A CHILD WHO IS DEAF OR HARD OF HEARING, IN ADDITION TO ANY OTHER REQUIREMENTS

Appendices

ESTABLISHED BY THE STATE BOARD, THE COMMITTEE SHALL CONSIDER THE RELATED SERVICES AND PROGRAM OPTIONS THAT PROVIDE THE CHILD WITH AN APPROPRIATE AND EQUAL OPPORTUNITY FOR COMMUNICATION ACCESS. THE COMMITTEE SHALL CONSIDER THE CHILD'S SPECIFIC COMMUNICATION NEEDS AND, TO THE EXTENT POSSIBLE UNDER PARAGRAPH (g) OF THIS SUBSECTION (4.7), ADDRESS THOSE NEEDS AS APPROPRIATE IN THE CHILD'S INDIVIDUAL EDUCATIONAL PROGRAM. IN CONSIDERING THE CHILD'S NEEDS, THE COMMITTEE SHALL EXPRESSLY CONSIDER THE FOLLOWING:

(I) THE CHILD'S INDIVIDUAL COMMUNICATION MODE OR LANGUAGE;

(II) THE AVAILABILITY TO THE CHILD OF A SUFFICIENT NUMBER OF AGE, COGNITIVE, AND LANGUAGE PEERS OF SIMILAR ABILITIES;

(III) THE AVAILABILITY TO THE CHILD OF DEAF OR HARD-OF HEARING ADULT MODELS OF THE CHILD'S COMMUNICATION MODE OR LANGUAGE;

(IV) THE PROVISION OF APPROPRIATE, DIRECT, AND ONGOING LANGUAGE ACCESS TO TEACHERS OF THE DEAF AND HARD OF HEARING AND INTERPRETERS AND OTHER SPECIALISTS WHO ARE PROFICIENT IN THE CHILD'S PRIMARY COMMUNICATION MODE OR LANGUAGE; AND

(V) THE PROVISION OF COMMUNICATION-ACCESSIBLE ACADEMIC INSTRUCTION, SCHOOL SERVICES, AND EXTRACURRICULAR ACTIVITIES.

(b) TO ENABLE A PARENT TO MAKE INFORMED DECISIONS CONCERNING WHICH EDUCATIONAL OPTIONS ARE BEST SUITED TO THE PARENT'S CHILD, ALL OF THE EDUCATIONAL OPTIONS PROVIDED BY THE SCHOOL DISTRICT AND AVAILABLE TO THE CHILD AT THE TIME THE CHILD'S INDIVIDUAL EDUCATIONAL PROGRAM IS PREPARED SHALL BE EXPLAINED TO THE PARENT.

(c) NO DEAF OR HARD-OF-HEARING CHILD SHALL BE DENIED THE OPPORTUNITY FOR INSTRUCTION IN A PARTICULAR COMMUNICATION MODE OR LANGUAGE SOLELY BECAUSE:

(I) THE CHILD HAS SOME REMAINING HEARING;

(II) THE CHILD'S PARENTS ARE NOT FLUENT IN THE COMMUNICATION MODE OR LANGUAGE BEING TAUGHT; OR

(III) THE CHILD HAS PREVIOUS EXPERIENCE WITH SOME OTHER COMMUNICATION MODE OR LANGUAGE.

(d) NOTHING IN THIS SUBSECTION (4.7) SHALL PRECLUDE INSTRUCTION IN MORE THAN ONE COMMUNICATION MODE OR LANGUAGE FOR ANY PARTICULAR CHILD. ANY CHILD FOR WHOM INSTRUCTION IN A PARTICULAR COMMUNICATION MODE OR LANGUAGE IS DETERMINED TO BE BENEFICIAL SHALL RECEIVE SUCH INSTRUCTION AS PART OF THE CHILD'S INDIVIDUAL EDUCATIONAL PROGRAM.

Appendices

(e) NOTWITHSTANDING THE PROVISIONS OF SUBPARAGRAPH (II) OF PARAGRAPH (a) OF THIS SUBSECTION (4.7), NOTHING IN THIS SUBSECTION (4.7) MAY BE CONSTRUED TO REQUIRE THAT A SPECIFIC NUMBER OF PEERS BE PROVIDED FOR A CHILD WHO IS DEAF OR HARD OF HEARING.

(f) NOTHING IN THIS SUBSECTION (4.7) SHALL ABROGATE PARENTAL CHOICE AMONG PUBLIC EDUCATIONAL PROGRAMS AS PROVIDED IN SECTION 22-20-109 OR ARTICLES 30.5 OR 36 OF THIS TITLE OR AS OTHERWISE PROVIDED BY LAW.

(g) NOTHING IN THIS SUBSECTION (4.7) SHALL REQUIRE A SCHOOL DISTRICT TO EXPEND ADDITIONAL RESOURCES OR HIRE ADDITIONAL PERSONNEL TO IMPLEMENT THE PROVISIONS OF THIS SUBSECTION (4.7).

SECTION 4. Safety clause. The general assembly hereby finds, determines, and declares that this act is necessary for the immediate preservation of the public peace, health, and safety.

Approved: March 18, 1996

Capital letters indicate new material added to existing statutes; dashes through words indicate deletions from existing statutes and such material not part of act.

Appendix B: Colorado Educational Interpreter Standards Law

22-20-116. Minimum standards for educational interpreters for the deaf in the public schools - committee to recommend standards - rules.

(1) The general assembly hereby finds that interpreting services in administrative units, state-operated programs, and approved facility schools for students who are deaf or hard of hearing need to be improved and that the absence of state standards for evaluating educational interpreters allows for inconsistencies in the delivery of educational information to students who are deaf or hard of hearing. The general assembly recognizes that educational interpreters in such educational settings must not only interpret the spoken word but must also convey concepts and facilitate the student's understanding of the educational material. The general assembly also finds that standards should be based on performance and should be developed with input from the deaf community and from persons involved in instructing deaf students. Therefore, the general assembly enacts this section for the purpose of developing appropriate standards for persons employed as educational interpreters in administrative units, state-operated programs, and approved facility schools.

(2) For purposes of this section, "educational interpreter" means a person who uses sign language in an administrative unit, a state-operated program, or an approved facility school for purposes of facilitating communication between users and nonusers of sign language and who is fluent in the languages used by both deaf and nondeaf persons.

(3) Repealed by Laws 1997, H.B.97-1146, § 1, eff. July 1, 1998.

(4) Repealed by Laws 2003, Ch. 315, § 35, eff. May 22, 2003.

(5) Repealed by Laws 2003, Ch. 315, § 35, eff. May 22, 2003.

(6) After review and study of the recommendations of the interpreter standards committee, the state board, on or before July 1, 1998, shall promulgate rules setting minimum standards for educational interpreters for the deaf employed by or in an administrative unit, a state-operated program, or an approved facility school. The state board may revise and amend such minimum standards as it deems necessary. The state board shall promulgate rules that set forth the documentation that a person seeking employment as an educational interpreter for the deaf must submit to the employing administrative unit, state-operated program, or approved facility school.

(7) On or after July 1, 2000, in addition to any other requirements that an administrative unit, a state-operated program, or an approved facility school may establish, any person employed as an educational interpreter for deaf students on a full-time or part-time basis by or in an administrative unit, a state-operated program, or an approved facility school shall meet the minimum standards for educational interpreters for the deaf as established by rules of the state board.

Source: L. 97: Entire section added, p. 70, § 1, effective March 24. L. 2003: (4) and (5) repealed, p. 1991, § 35, effective

Appendices

May 22. L. 2004: (6) and (7) amended, p. 1629, § 28, effective July 1. L. 2006: Entire section amended, p. 333, § 12, effective August 7.

Editor's note: Subsection (3)(d) provided for the repeal of subsection (3), effective July 1, 1998. (See L. 97, p. 70.)

* In June 2011, the Colorado State Legislature revised this statute to replace the wording "eligible facilities" with the new wording "approved facility schools."

Appendix C: Rules (for the) Administration of the Exceptional Children's Education Act

The statutory authority for the amendments to these Rules is found in Article 20 of Title 22, C.R.S., Sections 22-20-104, 22-2-107(1)(a), 22-2-107(1)(c), and 22-2-107(1)(q). The purpose of the amendments to Rule 1 CCR 301-8, 2220-R-3.04(1)(f) is to reflect additional statutory requirements for the development of minimum standards for Educational Interpreters for the Deaf as specified in C.R.S. 22-20-116. The amendments to Rules 1 CCR 301-8, 2220-R-2.02(9), 3.01(5)(a), 4.01(3)(c), 4.02(4)(k)(v), 5.02(4), 6.02(2), and 8.02(1)(f)(i) are the result of a review by Legislative Legal Services.

3.04(1)(f) Educational Interpreters

As of July 1, 2000, any person employed as an Educational Interpreter by an AU or approved facility school on a full-time or part-time basis shall meet the following minimum standards, and documentation for meeting these standards must be renewed every five years:

3.04(1)(f)(i) Demonstration of a rating of 3.5 (average) or better in the four areas of the Educational Interpreter Performance Assessment (EIPA).

3.04(1)(f)(ii) Documented content knowledge in these areas: child development, language development, curriculum, teaching and tutoring methods, deafness and the educational process for deaf children.

The Colorado Department of Education will provide guidelines for the implementation of these minimum standards.

Appendix D: Colorado State Board of Education Educator Licensing Act of 1991

1 CCR 301-37

4.14 Educational Interpreter Authorization (Ages Birth-21)

The educational interpreter authorization allows a school district to employ a person to provide teaching and interpreting services for students who are deaf or hard of hearing.

- 4.14(1) An educational interpreter authorization is valid for five years and may be renewed for succeeding five-year periods upon application and submittal of documented evidence of completion of six semester hours of professional development or its equivalent of 60 contact/clock-hours in educational interpreter content.
- 4.14(2) The applicant must provide documented evidence of:
- 4.14(2)(a) an associate's or higher degree in educational interpreting or a related field.
 - 4.14(2)(b) a certificate of completion for the Educational Interpreter Performance Assessment (EIPA) written exam.
 - 4.14(2)(c) successful performance on one or more of the following professional skill assessments:
 - 4.14(2)(c)(i) for sign language interpreters, a score of 3.5 or higher on the EIPA or current certification with the Registry of Interpreters for the Deaf (RID);
 - 4.14(2)(c)(ii) for cued speech transliterators, a score of 4.0 or higher on the EIPACued Speech exam or a passing score on the Cued Language Transliterator National Certification Exam (CLTNCE)
 - 4.14(2)(c)(iii) for oral interpreters, a current Oral Transliteration Certificate (OTC) from RID.
 - 4.14(2)(d) demonstration of the following competencies:
 - 4.14(2)(d)(i) effectively analyze communication for the speaker's style, affect, register and overall prosodic and coherence markers;

Appendices

4.14(2)(d)(ii) effectively manage the interpreting process in order to produce a linguistically appropriate representation of classroom communication, as based on student ability and the individualized education plan (IEP) goals;

4.14(2)(d)(iii) manage the process for effectively switching from one speaker and mode to another;

4.14(2)(d)(iv) utilize attending and interrupting techniques effectively, based on culturally appropriate methods and classroom protocol; and

4.14(2)(d)(v) effectively apply knowledge of:

4.14(2)(d)(v)(A) cognitive processes associated with consecutive and simultaneous interpreting, and the implication of each for interpreting classroom discourse;

4.14(2)(d)(v)(B) the differences between classroom discourse and conversational discourse, and the implication of those differences in the interpreting process;

4.14(2) (d)(v)(C) communication processes with inclusive students who are deaf or hard-of-hearing as related, but not limited to, issues of taking turns, avoiding overlap of speaking/signing processes, challenges associated with the use of multimedia and uncaptioned materials; and

4.14(2)(d)(v)(D) classroom subject matter concepts and associated vocabulary and terminology.

4.14(3) The educational interpreter is knowledgeable about the educational process with inclusive students who are deaf or hard-of-hearing and is able to:

4.14(3)(a) identify and communicate information about current concepts, practices, issues and trends relevant to interpreting in a public school setting.

4.14(3)(b) demonstrate awareness of current publications, resources, legislation and educational materials related to interpreting in K-12 settings.

4.14(4) The educational interpreter is knowledgeable about audition and is able to:

4.14(4)(a) demonstrate basic knowledge of degrees of hearing loss and the varying effects on language and speech development, and the implication of those effects on the interpreting process.

4.14(4)(b) demonstrate basic knowledge of personal and classroom amplification

Appendices

systems, their benefits and limitations, and the impact of such systems on the interpreting process.

4.14(4)(c) demonstrate the ability to conduct basic trouble-shooting for hearing aids, cochlear implants and FM systems.

4.14(5) The educational interpreter is knowledgeable about the roles of the educational team members and is able to:

4.14(5)(a) communicate specific professional roles, functions and formal and informal relationships related to various responsibilities such as, but not limited to, interpreting, tutoring, aiding and consulting.

4.14(5)(b) articulate and demonstrate techniques for collaborative problem-solving and decision-making among professionals working with students who are deaf or hard-of-hearing.

4.14(5)(c) demonstrate respect for differences in students and families.

4.14(5)(d) provide input to IEP development and assist in implementing IEP strategies, as related to educational interpreting.

4.14(5)(e) identify and gain access to resources relevant to sign language communication, interpreting and deafness-related topics.

4.14(6) The educational interpreter is knowledgeable about curriculum, teaching and tutoring methods and is able to:

4.14(6)(a) demonstrate and apply knowledge of instructional strategies/techniques relevant to the tutoring of elementary and secondary students in general education courses.

4.14(6)(b) articulate and demonstrate ways to collaborate with teachers regarding individualized modifications to and/or adaptation of materials, the curriculum and the learning environment to address the language and auditory competencies of students who are deaf or hard-of-hearing.

4.14(7) The educational interpreter is knowledgeable about child development and is able to:

4.14(7)(a) articulate the psychological, sociological and physiological development of students with normal hearing and students with a hearing loss as related to interpreting and tutoring.

4.14(7)(b) discuss the potential impact of hearing loss on processing, motor, visual language and cognitive development, as related to interpreting and tutoring.

Appendices

4.14(7)(c) as part of the educational team, discuss common medical conditions and medications which may impact performance in the classroom when related to interpreting and tutoring.

4.14(7)(d) effectively communicate about spoken language and sign language development and of the implications for the interpreting process.

4.14(7)(e) articulate the relationships between language, cognition, literacy and academic content areas and the implications for the interpreting process.

4.14(7)(f) monitor personal sign language use with regard to flexibility and adaptability to match the student's mode of communication, as designated on the IEP.

4.14(8) The educational interpreter is knowledgeable about meeting the social and emotional needs of students who are deaf or hard-of-hearing and is able to:

4.14(8)(a) demonstrate techniques that educators might use in creating a positive and effective learning environment, conducive to the encouragement of achievement.

4.14(8)(b) demonstrate the fostering of independence in students who utilize an interpreter.

4.14(8)(c) acquire and use available resources relevant to the experience, self-awareness and identity of students who are deaf or hard-of-hearing.

If either and I or U is checked in any area, specific problem information must be given in the comment section.

INTERPRETER	E	P	I	U
Facilitates communication in the classroom				
Interprets content and non-content areas				
Adapts signing level to communication needs of student				
Assists the student and other professionals in understanding the role of the interpreter				
Ensures appropriate logistics (e.g., lighting, seating)				
Appearance is appropriate (e.g., non-distracting clothes, jewelry, hair, make-up)				
Prepares for content and message delivery				
Prepares clear and appropriate information for substitute interpreters				
Interprets at school functions as needed (may be additional time outside of regular contracted hours)				
Comments:				

TUTOR	E	P	I	U
Provides tutoring services under the direction of a certified teacher:				
Demonstrates knowledge of subject matter				
Prepares for content				
Implements instructional strategies as identified by the IEP team				

Appendices

TUTOR	E	P	I	U
Assists students and other professionals in understanding the role of the tutor				
Comments:				

TEAM MEMBER	E	P	I	U
Provides consultation regarding strategies to:				
Promote student independence				
Encourage direct communication across various interactions				
Address discipline problems and procedures to supervisor				
Address concerns related to a student's needs to supervisor or other appropriate person				
Educate others regarding the implications of hearing loss				
Attend meetings or provides information to the team about concerns				
Adhere to school policies and procedures				
Collaborate with student's educational team members				
Communicate a feeling of respect towards students and adults in words and actions				
Establish consistent communication with the teacher of the deaf/hard of hearing regarding the student(s) progress in the mainstream setting				

Appendices

TEAM MEMBER	E	P	I	U
Ability to develop rapport with the D/HH students				
Comments:

Appendix I: Professional Conduct Guidelines

	<p style="text-align: center;">EIPA Guidelines of Professional Conduct for Educational Interpreters</p> <p style="text-align: center;">Brenda Schick, Ph.D. Brenda.Schick@colorado.edu</p> <p style="text-align: center;">University of Colorado - Boulder</p>
---	---

This document describes obligations for educational interpreters employed in school settings. While the Code of Professional Conduct developed by the Registry of Interpreters for the Deaf (www.rid.org) and the National Association of the Deaf is a very useful document for interpreters who work with adults, interpreters who work in schools are members of an educational system. Educational interpreters are working with children with developmental needs and with constraints and requirements imposed by educational practice and law. Because of this, it is appropriate to define guidelines for professional conduct for interpreters who work in educational settings. Figure 1 diagrams the relationship the educational interpreter has within the educational system, as a related service provider who is a member of the educational team. In fact, all people who work in public schools must adhere to professional standards and guidelines. In comparison, professional codes of conduct developed for adult consumers focusing on issues of autonomy and independence. In the case of educational interpreters, many of the rules and guidelines are defined by federal and state law, or by educational practice, not by an external professional organization. The school, and ultimately in many cases, the state and federal government, defines standards of practice. The educational interpreter is obligated to follow these standards, as a member of an educational team. The consequence of violating these rules is not merely expulsion from a professional organization. The school itself has an obligation to ensure that its employees follow the laws and regulations, especially in the case of children whose education is protected under federal law, the Individuals with Disabilities Education Act, or IDEA '04.

For the purposes of this document, the term interpreter refers to both interpreters and transliterators. The following presents professional guidelines for educational interpreters.

GENERAL EXPECTATIONS

Interpreters who work in the public schools as a related service provider are members of an educational team. As an adult in a student's educational life, the interpreter cannot avoid fostering or hindering development. Because of this, adults who work with children and youth often adapt their behavior and interaction to the maturity level of the student. This is also expected of interpreters. All children, deaf and hearing, are learning to be a member of a group, what is expected of them, how to follow formal instruction, and how to interact with peers. Schools foster broad development of children and youth, not just their intellectual development. Interpreters who work in public schools are an aspect of this broad development, and because of this, they should adapt to the maturity level and expectations for students at the various developmental levels.

Unfortunately, there is little research to provide guidance about when it is appropriate to use an interpreter with a child. What little we know from testimonials and anecdotal reports is that it may require a certain cognitive sophistication to use an interpreter. For very young children, such as preschoolers, it may not be appropriate to use an interpreter but instead it may be more appropriate to have a language mentor who can communicate with the child directly. Consequently, any discussions regarding the use of an interpreter with a student should include a discussion of whether the student is developmentally ready to use an interpreter. In addition, for all children and youth, it is appropriate and necessary to help students understand and assume responsibility about how the interpreter is used. All children and youth who receive interpreting services should be taught how to use and manage their learning via an educational

Appendices

interpreter. In fact, learning to use an interpreter is an essential aspect of development of a student who is deaf and hard of hearing. As children grow older, they can increasingly participate using an interpreter as well as managing their learning with an interpreter.

Students with language skills that are delayed need a skilled interpreter, contrary to educational practice in some schools. Interpreters who are not skilled are deleting and distorting aspects of language and classroom concepts essential for children to continue developing language. For students who are either delayed in language and still acquiring language, schools should consider allowing the student time with a fluent language role model, so that the interpreter is not the sole language model for the student.

These guidelines assume that an interpreter has met the minimum qualifications to effectively provide an interpretation of the educational program. This means that the interpreter should achieve at least a minimum level 3.5 on the EIPA, as well as having post-secondary training. A Bachelor's degree in educational interpreting or a related field is recommended. An individual with an EIPA below 2.5 should not be interpreting because the classroom content will not be even adequately communicated and the student will miss and misunderstand a large amount of the classroom information. The minimum level of 3.5 is truly a minimum level. Most professionals who are knowledgeable about interpreting for a developing child would acknowledge that interpreters must have skills above a minimum level of an EIPA 3.5. But they recognize that requiring a higher standard (e.g., 4.0 or greater) may not be realistic at this time. Therefore, requiring that an interpreter demonstrate skills at an EIPA level of 3.5 or greater is not a "Cadillac of services". It is a minimum level of competency.

Schools and school districts typically have guidelines and policies for professional behavior and conduct. First and foremost, an educational interpreter is a member of the educational team and school community. As a related service provider in a school, the educational interpreter should be familiar with policies, procedures, and ethics for professional conduct within the school setting. In these policies, there are specific guidelines for understanding confidentiality among educational team members, reporting child abuse, and exercising professional judgment. Some of these policies are dictated by state and federal law regarding all students, and are required of all individuals working in a school. Others are dictated by laws protecting the educational rights of students who are deaf and hard of hearing. Educational interpreters should request a copy of the policies and procedures handbook from their supervisor. In addition, they should discuss any situation where they are not certain how to handle an issue, or how they handled an issue in the past, with a supervisor. Any evaluation should consider the interpreter as a member of the educational community as well as their ability to interpret.

LEGAL REQUIREMENTS FOR ALL INDIVIDUALS WORKING IN PUBLIC SCHOOLS

All individuals who work in a public school must report any suspicions of child abuse or neglect to the proper authorities. Always know and follow your school policy regarding this or you may be held legally responsible. Interpreters should inform students that they must report any conversations where the student admits to unlawful activity, such as drug and alcohol abuse, bringing weapons to school, etc. Typically, this is required of all school personnel. The student should understand that communications with the interpreter outside of class are no different than communications with teachers and other school personnel. Any communication that occurs outside of the interpreted classroom activity is not confidential.

Appendices

Interpreters should always act to protect the safety of all students in the classroom, not just the student who is deaf or hard of hearing. This means that the interpreter may need to stop interpreting if intervention is needed because there is a reason to believe that someone will be injured. The interpreter can explain the situation after the danger is passed. Except for emergency situations, the interpreter should not be put in charge of the mainstream class.

Working with a Student Whose Education is protected under Federal IDEA, Which is any Student who has an IEP

Following federal law (IDEA), all decisions regarding the student's educational program are made within the context of the educational team, as identified in the student's IEP. Generally, for a student who is deaf or hard of hearing, members of the educational team may include: a teacher of the deaf, a regular classroom educator, a speech pathologist, or an audiologist. In addition, parents or legal guardians are also obligatory members of the IEP team. The educational interpreter should be a member of this team and should understand the educational goals for the student.

The educational Interpreter is a member of the educational team.

Interpreters should participate in all IEP meetings concerning students they work with. The educational interpreter shall either interpret or participate in meetings such as staff meetings, IEP meetings, and staffings, but should not do both. Interpreters can provide valuable contributions about how the student is functioning with an interpreter and can answer questions and address concerns related to a student's communication needs. However, educational interpreters typically have no specialized training in language or communication assessment, so they should work with other professionals who are qualified to conduct assessments. Despite this, the educational interpreter can often share useful observations. In general, as a member of the educational team, the interpreter can provide information regarding interpreting, classroom interaction, and tutoring.

Communication with the student's family should be in the context of the educational team. In general, interpreters should direct most parent questions to the appropriate professional, which may include questions regarding a student's progress in class, homework assignments, tardiness, and absenteeism.

If the educational interpreter is also functioning with a particular student as a tutor, this person may discuss the student's performance in the tutoring session. This may include tutoring strategies. (e.g., interpreters, teachers, or supervisors) who are directly responsible for the educational program of the deaf or hard of hearing students. Other information that may be important for the educational team to know include anything that may impact a student's performance or learning, such as tardiness, effects of medication, fights with peers, or inattentiveness in class. Some examples of questions that are appropriate for an interpreter may include:

- How does the Deaf or hard of hearing student communicate with the teacher, other school personnel and his peers?
- What are the interpreter's observations concerning the student's language and

Appendices

- preference for communication mode?
- How well does the Deaf or hard of hearing student attend to the educational interpreter?
- What interferes with being able to interpret the classroom? Are there aspects of classroom management and interactions that mediate or moderate learning?
- What modifications to the teacher's message does the interpreter routinely make? Is the interpreter making decisions to simplify the teacher's language and concepts, and for what reasons? Is the interpreter fingerspelling as is appropriate or using general signs due to a belief that the student would not comprehend fingerspelling?

The interpreter should understand the educational goals for a student he or she works with. Even though the interpreter is not the teacher, understanding the annual goals and the daily objectives will help the interpreter do a better job. The interpreter should be prepared to assist with support and implementation of educational goals in the classroom.

The educational interpreter may be asked to use American Sign Language or a particular system of Manually Coded English. If the interpreter has concerns about his or her skills with regard to this assignment, these concerns should be discussed with the supervisor. If the educational interpreter disagrees with the decisions of the educational team in terms of the use of a particular system of sign communication (e.g., SEE II, PSE, ASL) for a student, the interpreter should discuss this with the educational team.

Standardized testing is a critical aspect of assessing the student's achievement. Because of this, the interpreter should have preparation time to discuss test administration with a professional knowledgeable about students who are deaf or hard of hearing and about the specific test. There are some interpreting practices that may invalidate test results or may overly assist the student. On occasion, the educational team may decide that a student who is deaf or hard of hearing should have an alternate method of testing. The educational interpreter should be familiar with, and competent to make the language used on a test as accessible as possible to the deaf or hard of hearing student.

Tests, projects, and evaluations produced by the classroom teacher should be discussed with that teacher to help determine what can or cannot be explained. For example, the student may be required to know some vocabulary, while other terms may be secondary to the concept. The classroom teacher should decide this. If the teacher's main interest is whether the student understands the concepts, without interference from reading skills, the teacher may choose to have the interpreter provide an interpretation of the test questions.

It should be noted that interpreters vary widely in their understanding of issues surrounding the education of students who have a hearing loss. Because there is typically no degree requirement for educational interpreters, and because many interpreter training programs have little coursework in educational issues, the educational team cannot assume that the interpreter is qualified to serve as a consultant or a resource. However, when an interpreter is knowledgeable, she can provide inservice training to both staff and peer students in their role in the classroom.

Guidelines for Interpreters Who Work with Students

All adults in an educational setting have the responsibility of fostering social development, in addition to more formal academic learning. While the interpreter must maintain an impartial role

Appendices

when interpreting, like the classroom teacher, she is also an adult role model for a developing student. Because of this, it is important for the interpreter to maintain a relationship with the student that is appropriate to the student's age and the academic setting. This includes

maintaining rapport with students while also preserving professional boundaries. It is not appropriate to consider the student your friend or confidant. Inappropriate relations with a student may be grounds for dismissal.

It is important to recognize that the interpreter works for the educational program, not for the deaf or hard of hearing student or the family. The interpreter's goal is to facilitate communication between deaf and hearing people and to communicate clearly what each individual says. Because of this, it is important to maintain a healthy relationship with all adults and students in the interpreted classroom. Hearing students often need help negotiating an interpreted conversation, and that communication is equally important in a student's educational life. All students and staff should be helped to understand the roles and boundaries of the interpreter. All people should be encouraged to speak directly to the student and not to the interpreter. Decisions regarding whether a student needs an interpreter to communicate with teachers and peers should be made with input from the entire community, not just the student who is deaf or hard of hearing.

Educational interpreters should have preparation time to review lesson goals and vocabulary or to consult with educational team members. An interpreter can produce a better interpretation when prepared or when knowledgeable about the topic area. For technical classes, such as biology, geometry, and computer science, it often takes time for an interpreter to develop the specialized vocabulary necessary to understand the content.

It is not appropriate for the interpreter to share attitudes and opinions with the student about other adults in the school environment. Regardless of whether the interpreter views the message as being incorrect, incomplete, morally inappropriate, or lacking in direction, the interpreter is not at liberty to communicate her opinions to the students.

There are many factors that impact the accuracy of an interpretation, such as visual distractions, the interpreter's skills and knowledge, as well as the teacher's style of instruction. Ultimately, it is the interpreter's responsibility to inform the teacher and/or student when concerned about the completeness of an interpreted message. The interpreter should inform the student and the teacher if he or she feels that the teacher's message was not communicated accurately.

It is assumed that all verbal communication as well as environmental sounds will be signed when appropriate and that all signed communication will be voiced when appropriate. There may be situations when it is impossible or inappropriate to interpret all communication and sounds. Decisions regarding what to represent and what to disregard should be discussed with the classroom teacher.

Some deaf or hard of hearing students may not fully understand the interpretation of an English message due to differences in culture, language, or experience. It is appropriate for educational interpreters to clarify bits of information that fit into this category (e.g., hearing-culture jokes, certain English vocabulary which does not translate well). However, this is to be done on a limited basis for the benefit of clear communication and should not interfere with the teacher's message.

Appendices

While the interpreter is responsible for interpreting, like all adults in an educational environment, he or she is also responsible to the school's discipline goals. The classroom teacher determines the philosophy of discipline for the classroom. The extent to which the interpreter should participate in classroom discipline of all students should be discussed with the classroom teacher. For the most part, discipline should be administered by the classroom teacher. However, it is not appropriate for the interpreter to disregard highly inappropriate behavior from any student in the classroom. From a developmental perspective, all students should know that adults are consistent in their judgment of inappropriate behavior as well as their response to it.

It is not the interpreter's role to protect the student from discipline or failure. With regard to homework, fooling around, persistent lack of attention, and failure to participate appropriately, the deaf or hard of hearing student should be treated like all other students in the classroom. The Deaf or hard of hearing student should be allowed the freedom to make choices and to learn as independently as possible (as the hearing students do). The interpreter should not help the student with work, unless explicitly acknowledged by the educational team. This should be considered tutoring and follow tutoring guidelines (see Tutoring Section).

The interpreter should clarify his or her role to any member in the school setting, including the deaf or hard-of-hearing student. It is appropriate for the interpreter to help deaf and hearing students understand the role of an interpreter. This may involve giving clues to a student or explicitly informing the student of how to handle an interpreted situation. The student should be guided to assume more responsibilities for directing the interpreter as he or she becomes more mature.

Students who are deaf and hard of hearing are very dependent on their vision. When the teacher is talking, it may be necessary for a student to also look at a picture, graph, or other sources of information. This can easily create barriers to learning in that the student has to look at too many competing sources of information. The interpreter should work with the classroom teacher to ensure that all educational content, language and visual information are accessible to the student. In addition, the interpreter should be aware that:

- Eye fatigue will be experienced by the student.
- All students vary in their attention span and tendency to be distractible, and this changes as children mature.
- All instructional and non-instructional stimuli will be in competition for the student's attention. The student cannot be expected to attend to everything at the same time. Because of this, the student may occasionally look away from the interpreter.
- An interpreter may need to adjust communication depending on a student's need to rest their eyes momentarily.
- For a student who is young, a subtle cue from the interpreter may be necessary to help the student refocus attention.
- If a student is consistently inattentive, it should be discussed with the classroom teacher and the educational team. Initially the classroom teacher should address the problem with the student directly. If necessary, the educational team may assist the student in learning about how to use interpreting services.

The primary mode of learning for many students who are hard of hearing or students with

Appendices

cochlear implants is through the auditory channel, with the interpretation providing critical supplemental information. This student may choose to watch the teacher, using the interpreter to provide missed information or to verify information received. Because of this, the interpreter should continue to interpret even if the student chooses to watch the teacher.

An educational interpreter shall consider the following information about an assignment to determine if his or her skills are adequate for the assignment:

- the age level of the student
- the content of the various classes
- situations calling for special interpreting skills (i.e. films, assembly programs)
- the student's language skills
- the interpreter's language skills (ASL, PSE, MCE, spoken and written English)
- The student's sign language preference (ASL, PSE, MCE, spoken and written English)

Interpreters should continue to develop knowledge and skills through participation in workshops, professional meetings, interaction with professional colleagues and reading of current literature in the field. All professionals should take part in continuing education activities, both general to education and specific to interpreting. In order to be respected as a member of the educational team, and to provide students with access to the classroom, interpreters should be improving their skills and knowledge continually. Interpreters should be aware of continuing education requirements in their state.

Interpreters shall dress in a professional manner that is appropriate to the setting. An interpreter's appearance needs to be non-distracting in order to prevent eye fatigue among the Deaf and hard of hearing students. Clothing should be of contrasting color to the skin and pattern free. Jewelry should not be distracting. Facial hair should be trimmed to allow clear viewing of lip movements. The style of dress should be consistent with that of the classroom teachers.

TUTORING

In many schools, educational interpreters are asked to tutor the deaf or hard of hearing student. Typically, interpreters are not trained to tutor, so training and supervision are essential. There are advantages to having the educational interpreter conduct tutoring. It allows direct communication during tutoring, which is preferable to interpreted communication. The interpreter often knows the student and classroom materials. The interpreter also understands aspects of how hearing loss affects language and interaction.

There are also disadvantages. It may be difficult for the student or the interpreter to separate roles and responsibilities associated with tutoring from those associated with interpreting. This may mean that the student and the interpreter assume that they are constantly in the role of interpreter/tutor, rather than two distinct roles. The student may become overly dependent on the interpreter. The interpreter may not have sufficient grasp of the content or tutoring techniques to be effective. Also, if the student failed to understand classroom concepts because of a poor interpretation or lack of sign vocabulary, the interpreter may not be able to communicate the concepts during tutoring either. If the educational interpreter is asked to tutor, the following guidelines should be followed.

The interpreter should not tutor if it interferes with the primary responsibility of interpreting.

Appendices

Tutors should receive training, which includes understanding effective tutoring techniques as well as an understanding of the subject matter. Tutoring should be conducted under the supervision of the classroom teacher. Under no circumstances should interpreters develop their own lesson plans or determine what should be tutored. Tutoring is not a substitution for effective interpreting. A student should not be tutored separately unless there is a clear educational need for it, as determined by the educational team. The interpreter should make it clear to the student when a role other than interpreter is assumed, such as tutoring.

ACKNOWLEDGMENTS

This document was prepared with help from the Colorado Educational Interpreter Committee, which oversees educational interpreting in Colorado, under the Colorado Department of Education. Many individuals were involved in developing these guidelines, including Sandy Bowen, Alice Boyle, Carol Husk Hilty, Cheryl Johnson, Leilani Johnson, Lynda Rimmel, and Kim Sweetwood. I would also like to thank Kevin Williams, Frances Beurivage, and Anna Witter-Merithew for their helpful comments.

Appendix J: Colorado Legal Interpreting Requirements

Use of the Educational Interpreter as an Intermediary Interpreter

The educational interpreter may have knowledge of unique individual communication needs of a student and their day-to-day environment. Thus the educational interpreter may be requested to assist the legally qualified interpreters to ensure a fully accurate interpretation that is legally defensible. In this capacity, the educational interpreter works at the request of the legally qualified interpreters assisting as needed.

Common Quasi-Legal Situations that Educational Interpreters may interpret:

- IEP meetings (The interpreter cannot simultaneously fulfill the role of interpreting for the IEP and also serve as a participant representing their work as a part of the educational team. Therefore, these two roles should be filled by separate interpreters. Also, for meetings addressing due process or at the request of the parents a legally qualified interpreter should be provided.)
- DARE or other educational programs that involve law enforcement or other legal personnel
- Parent-teacher conferences (if not participating as a member of the educational team)
- Counseling sessions unless intent is to take a statement for a legal proceedings

Circumstances where Educational Interpreters should never be used:

- Interpreting while waiting for the legally qualified interpreter to arrive
- Accompanying the student to the police station for the purpose of interpreting
- Interpreting in any known legal situation without a qualified legal interpreter present

What if the Educational Interpreter is called to Testify to their Interpretation?

It is standard ethical practice for interpreters to maintain strict confidentiality in all their work. For the educational interpreter this means that all communication outside of the educational team is confidential. However, the legal system uses a higher standard for confidentiality known as privilege and that privilege only applies when the interpreter is working for interactions deemed as privileged e.g. attorney/client, doctor/patient etc. Therefore, it is possible that an interpreter may be called to testify regarding interpreting work for interactions that are not privileged.

Privilege does not exist in any law enforcement interactions, conversations with students, or classroom interactions. Educational interpreters can be called to testify regarding their work in settings not categorized as privileged. Students who are deaf and hard of hearing should be made aware that it is possible the interpreter may be called to testify in legal situations and that interpreters must abide by this legal requirement.

Recommendations

Each school should establish clear policy regarding the use of interpreters holding the Legal Credential Authorization, following the requirements of the Colorado Revised Statutes 13-90-201—210. All staff should be aware of the protocol for complying with the statute which will

Appendices

protect the school district and staff from legal challenges and liability. Educational Interpreters should never be placed in situations where they would be in violation of state law regarding interpretation involving the legal system.

While waiting for a legally qualified interpreter, or if the deaf or hard of hearing student needs to be accompanied off school grounds, another staff member should be selected to accompany the student, rather than the interpreter, in order to ensure that the interpreter is not placed in a compromising situation.

Regardless of the legal matter, implications are far reaching for all parties involved. Therefore, CDE urges full compliance in legal situations.
