

# John W. Buckner Automatic Enrollment in Advanced Courses Grant Program

## Fact Sheet

## Introduction

Students from traditionally underrepresented groups and low-income students of all racial and ethnic backgrounds who perform well in school do not enroll in advanced classes at the same rate as their peers, regardless of preparedness. All students deserve the opportunity to learn higher-level content. In addition, students who have access to a rigorous curriculum perform better across multiple measures, including graduating high school and completing higher education.

The John W. Buckner Automatic Enrollment in Advanced Courses Grant Program, [Senate Bill 19-059](#), is intended to increase the number of students enrolled in advanced courses for subjects in which the student has demonstrated proficiency.

The first year of funding for the program was the 2019-20 school year, with the last year of funding planned to be the 2021-22 school year. However, funding was provided for the 2022-23 school year as well.

## Funding and Participation

As in previous years, approximately \$220,000 is available for the 2022-23 school year, and grants will be awarded for a one-year period. Funding in subsequent years for grantees is contingent upon continued appropriations and grantees meeting all grant, fiscal, and reporting requirements.

Allowable services or activities include:

- Expanding the number of advanced courses offered by the Local Education Provider, including the use of technology to increase the number of advanced courses offered;
- Incentivizing teachers to teach advanced courses, including teacher training and professional development in areas relating to advanced course instruction;
- Developing advanced course curriculum; and
- Expanding parent and student awareness of advanced course availability and enrollment as well as student success in advanced courses.

Prohibited use of funds include hiring new teachers for the purpose of teaching advanced courses.

## Eligibility

A Local Education Provider (LEP) is eligible for the grant program if it automatically enrolls each student entering the ninth grade or higher in an advanced course based on any of the following criteria:

- The student achieved a score that is equivalent to, or exceeds, meeting or exceeding expectations on the state assessment that was administered for the preceding academic year.
- Any other measure, applied to all students enrolled in a LEP that, in the judgment of the LEP, is an indicator that a student demonstrates the ability to succeed in an advanced course.

School districts, schools, Boards of Cooperative Educational Services and charter schools can apply for this grant. If a district applies, a school operating within that district may not submit a standalone application. A school can apply only if its district does not intend to apply.

## Reporting

Grantees are required to submit an annual report to the Department of Education that includes:

- The number of students enrolled in advanced courses before and after implementation of the grant program;
- The number of students automatically enrolled in advanced courses by the local education provider before and after implementation of the grant program;
- Demographic information of students automatically enrolled in advanced courses, including grade, race, ethnicity, gender, and socioeconomic information before and after implementation of the grant program;
- The number of students in grades 4-8 automatically enrolled in advanced courses before and after implementation of the grant program if applicable; and
- The ways in which grant dollars were utilized.

However, this data has only been gathered for one cohort. The first cohort of grantees (2019-20) was scheduled to submit their annual report in summer of 2020. Due to the COVID-19 pandemic, this reporting requirement was waived and the data not collected. During the second year of the grant (2020-21), funding was not provided due to the ongoing COVID-19 pandemic. Annual reports for the third cohort (2021-22) were due June 30, 2023, but only one grantee submitted their report. Cohort 4 (2022-23) is currently in their implementation year with the annual report due by June 2024.
